## ACADEMIC PROJECT:

TITLE: **CYBER THREAT DETECTION USING MACHINE LEARNING TECHNIQUES**

### Description:

The main goal is to detect the cyber attack in network. It happens in the way that when we consider long back years there may be so many attacks happened so when these attacks are recognized then the features at which values these attacks are happening will be stored in some datasets. By using four algorithms like Support vector machine (SVM), Artificial Neural networks (ANN), Random Forest (RF), Convolutional Neural Networks (CNN) which helps to identify the cyber attacks.
